MODEL 12

Model 12 Gater Grapple Lok Blok Manipulator

The Lok Blok Manipulator gives the excavator operator complete control when loading, unloading, installing, or placing 4000 pound concrete lok blocks. The center mounted hook hydraulically opens and spring closes. When closed the hook mechanically locks onto the attaching point of the block the operator lowers the stabilizers. The operator can slew the lok blok from side to side, 45 degrees each way from center and rotate it a full, continuous 360 degrees. All functions have lock valves. All operations are performed by the operator with no outside help is needed, making for a much safer and more efficient workplace

SPECIFICATIONS:

- under load cannot be opened
- 360 degree continuous rotation
- 45 degrees tilt both ways
- All functions have lock valves
- Enables one operator to do all
- Quick attach (optional)
- Lifts up to 4000 lb blocks
