Model 13

Gater Grapples Excavator Mounted Rotating Concrete & Asphalt Saw

Rotating Concrete & Asphalt Saw is ideal for contractors and municipalities engaged in underground utility work, road and parking lot maintenance, driveway, sidewalk and foundation repair. It is suitable for compact excavators and backhoes in the 15 to 35 HP range. Working from the comfort and safety of the cab, the operator commands an 18in blade capable of making a 7.5in deep cut in concrete or asphalt. Depth control rollers are adjusted electrically. The compact design of the RCS18 allows it to cut within 3 inches of a vertical wall; and with 360 degrees of rotation. Cab controls are equipped with an RPM Monitoring System allowing the operator to make necessary adjustments to the feed rate. A 35 gallon water reservoir with electric pump provides cooling and lubrication for the blade.

SPECIFICATIONS:

18in Diamond Blade (.187in thick)
 35 gallon water reservoir with pump
 Electrically Adjustable depth control
 360 degree rotation
 Cab controls with RPM Monitoring System

OPTIONS

Continuous rotation
 Electronic depth indicator
 Adjustable speed control to accommodate smaller diameter blades
 Larger sizes capable of handling a 30 inch blade are available for carriers up to 150 HP.
